# Care Essentials

## Slim Shaker Line

Modern Cabinets & Co cabinets require careful maintenance to preserve their smooth and reflective appearance. Using harsh or abrasive materials may damage the surface. Follow the instructions below to maintain the original finish and ensure long-term durability.

### **Approved Cleaning Materials**

- **Microfiber Cloths:** Use a dry or slightly damp microfiber cloth to remove dust and fingerprints. The fine fibers lift dirt effectively without scratching the surface.
- **Mild Soap Solution:** Mix a few drops of gentle dish soap with warm water. Dampen the microfiber cloth, wring out excess moisture, and wipe the surface carefully. Avoid soaking or allowing water to sit on the cabinets.
- **Avoid Harsh Products:** Do not use abrasive pads, scouring powders, ammonia, bleach, or solvents. These substances may dull or permanently damage the glossy coating.

### **Handling Stains and Spills**

- **Grease or Oil:** Wipe with a soft cloth dampened in a mixture of mild detergent and warm water. Rinse the cloth frequently to avoid spreading the grease.
- **Water Marks:** Create a paste using baking soda and water. Apply gently with a soft cloth using circular motions. Wipe clean and dry thoroughly.
- **Stubborn Stains:** Combine equal parts of vinegar and water. Test the mixture in an inconspicuous area first. Use a damp microfiber cloth to gently rub the affected spot, then wipe dry.

### **Additional Recommendations**

- Always dry cabinet surfaces immediately after cleaning to prevent moisture damage.
- Avoid direct exposure to sunlight over extended periods to minimize fading.
- Do not use waxes or polishes, as they may create residue or streaks on surfaces.

Proper maintenance ensures product longevity and preserves the factory-applied finish.

Normal wear and tear, damage or defects caused by accidents, misuse, abuse, lack of necessary maintenance, or acts of God; nor does it cover alter alteration, modification, improper installation, improper handling/storage, environmental conditions, nor any labor expenses. These are not covered by the warranty.

The variation in color and grain pattern in wood adds to its natural beauty and is not considered an imperfection. Environmental factors, including but not limited to artificial / natural light, moisture, cleaners, smoke, etc., may cause the darkening or mellowing of a cabinet over time. This is a natural process and can be expected. This warranty does not cover the natural aging or darkening / mellowing of wood color, the inherent growth characteristics of, or variation in wood.

Some of the cabinet lines feature a glaze, a glazed finish which accentuates the door and drawer front profiles. This glaze is hand applied over stains or paint and may, due to the nature of application, consist of random drips, runs, etc. As glazing is a hand applied there will be variations in color and appearance from door to door and cabinet to cabinet. This is not considered a defect and is considered normal with hand applied finishes. It is the nurture of wood to expand and contract to varying degrees depending on climate conditions. As a result, cabinet lines with painted surfaces may show fractures in the paint at joints. This is normal and is not considered a defect.
